

## Task 2: CSS Card UI

Create a beautiful user profile card similar to the one shown above.

### ✅ Your card should include:

- A circular profile image
- Name and role of the user (e.g., "CodingLab – YouTuber & Blogger")
- Social media icons (Facebook, Twitter, Instagram, YouTube)
- "Subscribe" and "Message" buttons with hover effects
- Reaction stats at the bottom (likes, comments, shares)

### 💡 Tips:

- Use **Flexbox** for layout
- Apply box-shadows and border-radius for visual depth
- Use **hover effects** for interactivity
- Keep the card responsive and well-aligned

Use only **HTML + CSS**. Do not use Bootstrap or frameworks. Be creative with colors, spacing, and visual hierarchy!
