

Task 3: Credit Card UI

Design a sleek credit card UI like the example below.

✓ Your card should include:

- Bank name (e.g., SBI)
- Card number (in standard 4x4 format)
- Validity dates (Start and Expiry)
- Cardholder name
- Card type logo (e.g., VISA, Mastercard)
- Chip and contactless icons

💡 Tips:

- Use **gradients** and **shadows** for a modern look
- Apply **Flexbox** for neat alignment
- Make the card **responsive**
- Use **border-radius** for rounded corners
- Add **hover effects** to enhance interactivity

Use only **HTML + CSS**. No external frameworks like Bootstrap allowed. Show your creativity through colors, fonts, and layout!
