

Task 4: Services Section UI

Create a clean and modern services section similar to the one shown below.

✓ Your services section should include:

- Section heading with **highlighted subheading** (e.g., "SPECIAL OFFER")
- Main title (e.g., "OUR BEST SERVICES")
- Six service boxes in 2 rows × 3 columns layout
- Each box must include an icon, service title, and short description

💡 Tips:

- Use **Flexbox** or **CSS Grid** for clean alignment
- Add **hover effects** to icons or boxes for interactivity
- Use **simple icons** (e.g., from FontAwesome or inline SVG)
- Make sure your layout is **responsive** for different screen sizes
- Use consistent spacing, typography, and color for a clean look

Use only **HTML + CSS** (no Bootstrap or frameworks). Make it visually appealing, and keep your code neat and modular!
